NOTIFICATION OF ANCILLARY MEDICAL SERVICES

As a patient of Orange County Urology Associates, you may receive ancillary medical services such as: anesthesia, imaging services (e.g., x-rays, CTs, MRIs), pathology specimen examination, specialized laboratory testing (e.g., genetics, hematology, chemistry, microbiology, urine, or pathology). These services are a distinct and separate medical service from those provided to you by the physicians at Orange County Urology Associates. You and/or your insurance will receive a separate bill for these services. Please be sure to ask us if you have any questions regarding the services or additional testing you may receive.

I have read and understand the above notification that some of these services may not be provided in my presence, but are necessary in the course of my diagnosis and treatment. I authorize payment directly for these services under the policy(s) or plan(s) issued to me by my insurance carrier. I may incur additional charges as a result of these ancillary services. I agree to pay all charges due with respect to such services after benefits paid on my behalf by any third-party are credited to my account.
